

## Chiropody Risk Assessment

SEVERITY		LIKLIHOOD
No Injury	1	Never
Minor Injury	2	Seldom
Injury	3	Possible
Serious Injury	4	Probable
Death	5	Always

X	5	4	3	2	1
5	25	20	15	10	5
4	20	16	12	8	4
3	15	12	9	6	3
2	10	8	6	4	2
1	5	4	3	2	1

Hazard	Risk	Severity	Likelihood	Risk Rating	Control Measure	Severity	Likelihood	Risk Rating
Lone Worker	Personal injury, conflict	3	3	9	No lone working permitted when performing chiropody or associated tasks – suggested open-door policy, plus an ‘escort’ for safety reasons and to mitigate against safeguarding issues.	3	2	6
Assault / Use of Sharps	Cause injury / death/ stress	3	3	9	No lone working permitted. Use of sharps to be extremely limited, preference given to abrasive tools including emery boards and similar.	3	2	6
Anti-Social Behaviour	Personal injury, conflict	3	3	9	Volunteers are offered guidance in deflecting topics and issues and to remove themselves from any potential conflict. Again, limited interaction on one-to-one as no lone working permitted should limit exposure to risk.	3	2	6
